Environmental Network

# The Company

## The Company

Landscape Architects Barry and Susan Moore founded Moore Environment in 1997 as a practice specialising in landscape architecture and environmental assessment, design and management. The firm is a Landscape Institute registered practice and is certified as an Associate Assessor by the Institute of Environmental Management and Assessment. Barry Moore is also a Fellow of the Institution of Highways and Transportation.

Since inception the Company has been committed to providing holistic and sustainable solutions to the design, planning and management of the built and rural environment.

“offering the highest levels of skill and experience in a wide range of fields”

design

# The Services

## Range of Services

We can contribute to any size or type of project at any stage, from site selection and initial planning through to detailed design, implementation and long term site management. Innovative, cost effective, holistic and sustainable solutions are available for:

- Landscape and built environment design
- Contract documentation, implementation and supervision on site
- Long term management
- Landscape and visual impact assessment
- Environmental Impact Assessment (including all topics) and Environmental Statements
- Environmental Scoping, planning advice and applications
- Production of exhibition and presentation material
- Effective project coordination and management to meet programme and cost

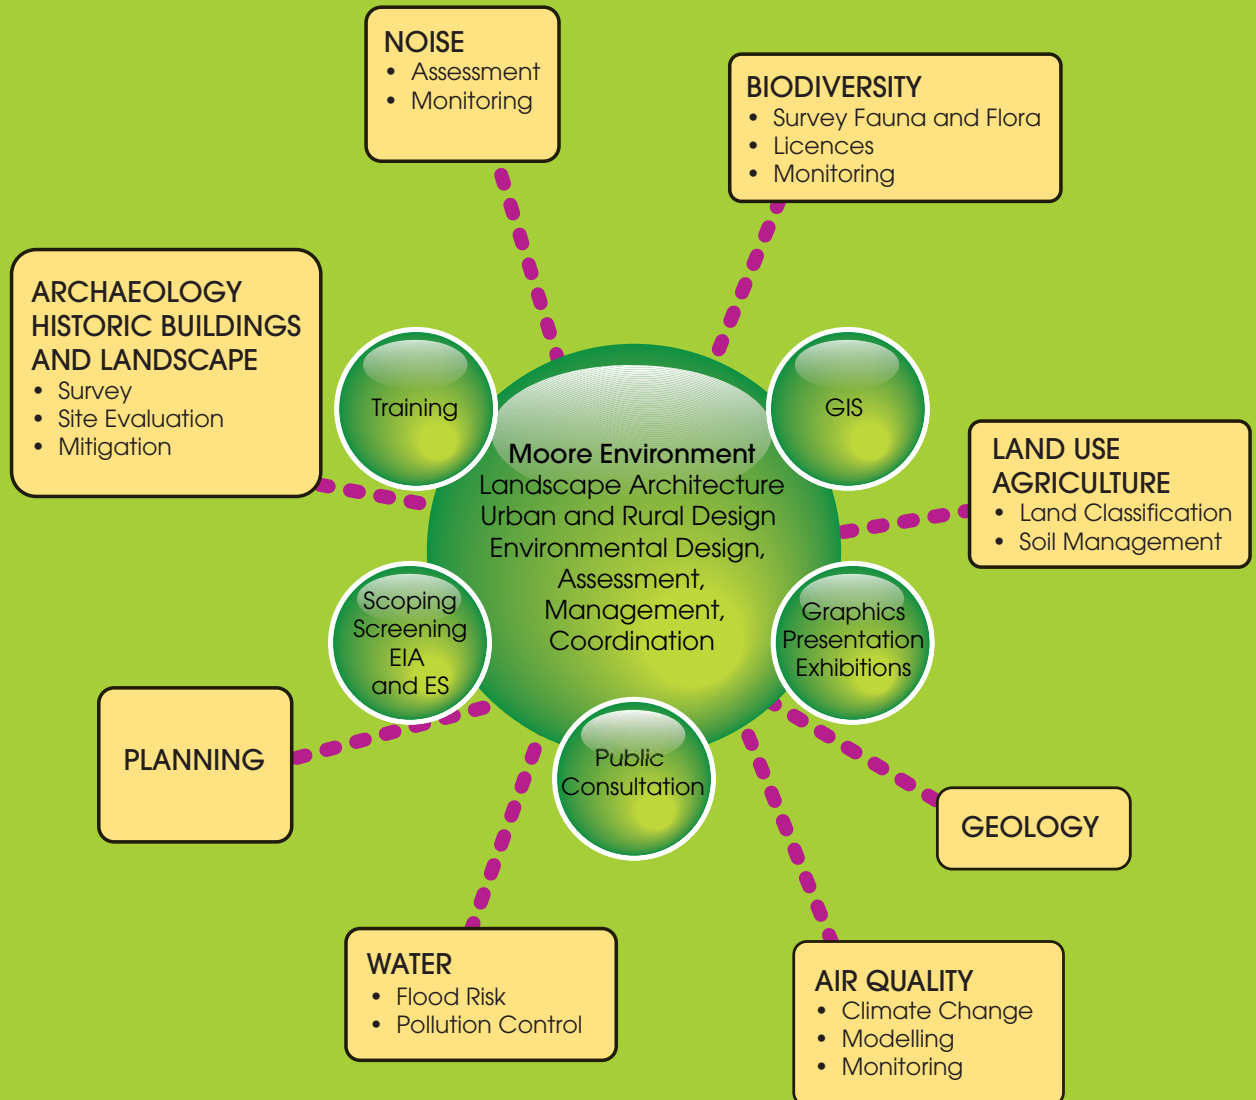

# assessment

## Moore Environment Network for Environmental Service

In addition to landscape architectural services Moore Environment also offers clients a one-stop shop of environmental expertise covering a complete range of topics - from acoustics to ecology to archaeology - by using a carefully selected network of specialist companies.

In this way we can provide a total and independent environmental service at highly competitive rates and offer the highest levels of skill and experience in a wide range of fields.

## Quality & Environmental Management

Moore Environment is committed to providing a high quality service and operates a combined Quality and Environmental Management System in accordance with ISO 9000:2000 and ISO 14001.

# The Projects

## Projects and Client Base

Moore Environment has successfully completed commissions ranging in scale from small community based works to large scale, high public profile projects.

Current and recent work includes the role of environmental co-ordinator and landscape architect on a range of national infrastructure schemes, housing, rural development, historic urban parkland, urban public realm, biodiversity roofs, college grounds and environmental initiatives.

Clients include government agencies, local authorities, major engineering consultancies and contractors, developers, architects, community based groups, schools and colleges and private clients.

## Location

The office is located in the town of Coleshill near Birmingham, close to junction 4 of the M6, the M6 Toll and Birmingham International airport and railway station, with quick and easy access to all parts of the country.
